The 2023-24 Academic Booklet is valid for that Session. Whilst every effort is made to ensure the contents of the Academic Booklet are accurate, the Academic Booklet is issued for the guidance of students and staff only. The Academic Booklet is not an offer to supply courses of study nor is it in any way to be construed as imposing any legal obligation on the College of Science and Engineering or University to supply courses either at all or in part in respect of any subject. No guarantee is given that courses, syllabuses, fees or regulations may not be altered, cancelled or otherwise amended at any time.

The Academic Booklet confers no rights on any student registered for the Session 2023-24.

Welcome to the University of Galway

Welcome to Science at the University of Galway and congratulations on your achievements to date. We are pleased you have chosen to study Science in our College of Science and Engineering. Our College is a research- intensive College and our research informs all our teaching.

Our programmes are progressive, diverse, and research-led. Drawing on the distinctive strengths of our region in areas such as medical technologies, marine ecology, data/ICT, sustainable energy and construction and enabling technologies, we work in partnership with business and industry to provide graduates with the skills and knowledge to drive innovation, economic growth and research, and to address global challenges and concerns.

The College now offers 22 different undergraduate degree programmes to over 1000 first-year students. All of our students are most welcome and, we wish each and every one of you success and hope that you fully partake of the opportunities presented to you both academically and socially during your time at the University.

To help you adjust to University life, we have assigned an Advisor to each first year student. You will be informed of your academic Advisor during the first few weeks of term. (*some programmes may not participate) Should circumstances arise during the year that adversely affect your performance at University, you should arrange to make an appointment to see your dedicated academic Advisor or our Student Support Officer, Kelly Moore. We look forward to meeting you at Orientation.

Professor Walter Gear.
Executive Dean.

Making the Transition to University

When students make the transition from school to University they are faced with a whole range of new experiences and issues. You may be living away from home for the first time, you may not know any of your classmates yet, you are probably not familiar with the campus and may not even be familiar with Galway city. One of the most significant issues for you though will be getting to grips with the way university differs from school. For instance, no one is going to nag you about deadlines.

Learning at university is of course a very different experience to that of being at school. For a start, as a student you are considered an adult learner, capable of managing your own study schedule and putting in the time to read textbooks, articles and other materials so that you really understand your chosen subjects and feel more confident as you progress.

Supplementary Learning outside of the classroom

The lectures, seminars, laboratory classes and other timetabled classes are actually only a small part of the total effort that you need to put in to succeed. Supplementary learning outside of lectures is a critical component of the learning experience. All of the assessment, coursework and available credit are based on the idea that you are spending a minimum of 40 hours per week, every week of the semester, on learning and assessment. This just represents a full-time workload and is the standard model used across Ireland and all courses that use European Credits (something called ECTS – European Credit Transfer System). In some courses it may be a little higher than this because of the nature of the subject.

The other big difference between university-level courses and some other types of qualification is that you really need to try to understand the subject and the ideas you come across in class or your reading. It's not about memorizing and regurgitating facts, but about seeing the ideas that lie behind them and being able to make use of knowledge to tackle new problems. That can be tricky to adjust to and sometimes it is really difficult to make sense of new concepts. The good news is, that this is exactly what learning something new is like for everyone. There are always ideas that are really tricky to grasp at first and which don't make sense until you try again and again, hopefully getting some feedback on your efforts and maybe through working with fellow students. But when it does 'click' things fall into place and you get a sense of satisfaction that hopefully makes some of that struggle worth it! That's why we say you need to spend so many hours on self-study, because we know from experience (and extensive research on education) that you will need that time.

Attendance and Submission of Assignments

It is essential that you get into the habit of attending all your lectures, tutorials and laboratories. Every year we see that there is a direct correlation between good attendance and good performance in examinations. All lecturers will routinely monitor attendance and poor attendance will have consequences.

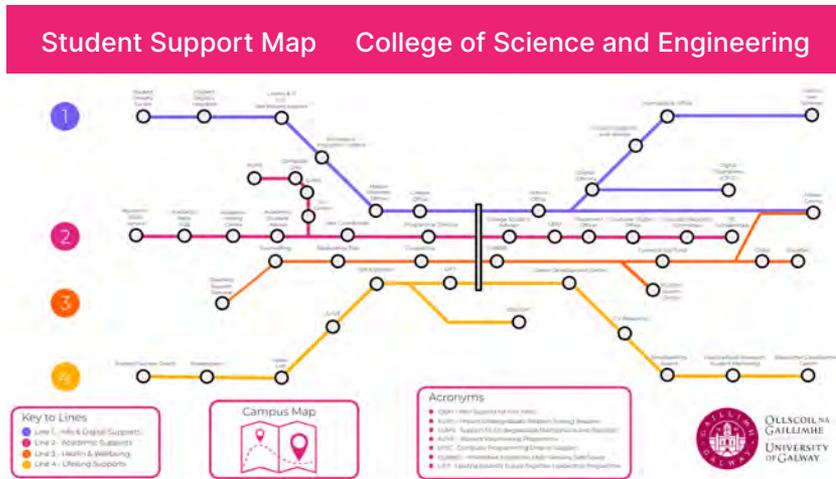

It is also critical that assignments are submitted on time. You will need to learn to prioritise your work and leave plenty of time for assignments. Familiarise yourself with the library so that you know where you need to go to locate books and articles relevant to your area of study.

“It’s not about memorizing and regurgitating facts, but about seeing the ideas that lie behind them and being able to make use of knowledge to tackle new problems.”

Supports in place

The University has in place a comprehensive range of supports and resources to help you transition to University life and learning. These span Helpdesk/info-type supports, Academic supports; Health and wellbeing supports and Lifelong learning/development supports. Examples of the academic supports that are available to you include Student Support Services facility, Orientation programmes, tours of campus, 1st year handbooks, a mentor system etc.

From an academic perspective there are also a range of invaluable supports in place such as the Academic Writing Centre, SUMS (Maths Support Centre) and DISC (Computer Programming Drop In Support Centre). See our Interactive Student Support Map universityofgalway.ie/science-engineering/studentinformation/.

Student Support Officer

“If you find yourself feeling overwhelmed or need help getting back on track, I am here to help.”

My name is Kelly Moore and I am the Student Support Officer in the College of Science and Engineering. My role is to support you during your time here at the University of Galway. Starting university can be an exciting but challenging time. If you find yourself feeling overwhelmed or need help getting back on track, I am here to help. I can offer personal support, advice and information on issues that affect your university experience, including general welfare and personal challenges that may compromise your ability to study. I can offer advice about study planning, time management, financial assistance and support you during medical, emotional, or mental health challenges you may be experiencing.

I provide a confidential, non-judgemental, and empathetic space for you to share your concerns. Please do not hesitate to get in touch with me. I am here to support you and I am looking forward to meeting you. Best of luck with this new and exciting chapter of your life. Best Wishes, Kelly Moore, Student Support Officer, Kelly.l.moore@universityofgalway.ie

To make an appointment with Kelly you can scan this QR code:

Student Success Coach

“First year is an exciting year that includes a lot of new experiences. Coaching can help you navigate change successfully.”

Hi all and a warm welcome to the University of Galway. I'm Denise McBride, the Student Success Coach for GY301 Science students. First year is an exciting year that includes a lot of new experiences. Coaching can help you navigate change successfully. Please reach out to me denise.mcbride@universityofgalway.ie for support with; making an successful transition into university life and your new community, increasing your self-awareness with the aim to maximise your interests, talents and values, and to explore co-curricular and extracurricular opportunities - e.g. societies, clubs, CÉIM peer learning, that can complement and support your degree. Contact me, I can offer one to one or group coaching sessions where you can have honest conversations, map out life goals, identify possible barriers to success and develop a personal action plan. I look forward to meeting you all.

The SUMS (**Support for Undergraduate Maths and Statistics**) is a drop-in maths support centre where any student can work on their maths questions, with expert tutors on hand to offer individual help if necessary.

The centre is FREE to students and is an initiative of the Students' Union and the School of Mathematical and Statistical Sciences. SUMS is located in Aras de Brun on the ground floor ADB-G023. Further information including opening hours, is available at:

universityofgalway.ie/public-sites/s-u-m-s/
Email: sums@universityofgalway.ie

Scan here for
more information

Canvas is a learning system which allows lecturers to post materials such as lecture notes, reading materials, weblinks, videos, quizzes, etc, online. Many courses also use this for announcements, news items and for students to submit their coursework. Canvas has a lot of additional tools and capabilities and quite which of these are used is decided by the lecturer or course team. Canvas is available 24/7 from both on and off campus. Not every lecturer or module will necessarily be using it, but most will and in different ways. You should certainly login regularly to check for updates to your modules.

ComputerDISC is a drop-in support centre for students who are enrolled in computer programming or software development courses. ComputerDISC is located in room IT-205 on the first floor of the Computer Science Building (formerly IT building). Students can drop in at any time during opening hours as no appointments are necessary. Further information can be found at universityofgalway.ie/science-engineering/school-of-computer-science/currentstudents/computerdisc/

The **Academic Writing Centre** (housed in the Library) offers free tutorials on essay writing. Last year, AWC tutors helped over 500 students to overcome recurrent problems with grammar, punctuation, spelling and essay structure. There is no need to make an appointment, simply drop in during the opening hours of the Centre <http://www.library.universityofgalway.ie/awc/>.

The Library operates a free **Academic Skills Hub desk** where you can access one-to-one support with information skills such as searching for books and journals, or referencing your work here <https://library.nuigalway.ie/academicskills/>

There is also an **online Academic Skills Hub** that brings together most of University of Galway's academic skills supports in one place. universityofgalway.ie/academic-skills/. This online resource is packed with tips, information, short guides, checklists, links, and more, to help you to develop key skills needed for academic success at University of Galway.

The Students' Union maintains a **Grind Register** service detailing a list of people offering grinds to students. Details are available here: Yourspace.universityofgalway.ie

“Last year, AWC tutors helped over 500 students to overcome recurrent problems with grammar, punctuation, spelling and essay structure.”

CÉIM Peer Learning

CÉIM is an academic peer learning programme for 1st year students in specific disciplines and is a joint initiative by the College of Science and Engineering and University of Galway Students' Union.

CÉIM is currently available to 1st year students studying:

- Engineering
- Project and Construction Management (PCM)
- Science (GY301)
- Biotechnology
- Genetics and Genomics

Designed to complement your lectures and tutorials, CÉIM helps you gain a better understanding of your coursework in a relaxed atmosphere, quickly adjust to life at University of Galway, become a successful higher education learner and get to know other students in your course. Research shows that students who attend CÉIM regularly achieve higher grades on average than those who do not. CÉIM sessions are welcoming and friendly, yet purposeful, with the emphasis on everyone in the group working together. Attendance is taken at CÉIM sessions.

Start Dates

- CÉIM sessions start:
- Week of 25 September: Engineering, PCM
 - Week of 2 October: Science (GY301), Biotechnology, Genetics and Genomics

www.ceim.su.universityofgalway.ie

How to take part

1	A few days before your CÉIM session starts, log into yourspace.universityofgalway.ie using your University of Galway student details
2	Click CÉIM in the left menu
3	See your CÉIM session time and information

Academic Advisory Scheme

The University is probably the largest organisation most of you will have been involved with. The numerous buildings, lecture theatres, labs, offices, teaching rooms and library space scattered across the campus host about 18,000 students and more than 3,000 staff. Added to this, you'll be learning a new vocabulary and negotiating new systems too.

The university is very aware of the big, exciting step you've taken in coming here and there are many supports available to students starting out on their university experience, some more formal than others. The College Academic Student Advisory Scheme offers informal supports and guides to all science students. Each of you will be assigned an Academic Advisor who will be a point of contact you, and who can guide or signpost you to any relevant supports or assistance you need. The role of the Advisor is to be another support for you and to help you navigate and negotiate the start of your university experience.

Your Advisor will contact you soon after you've registered to arrange an introductory meeting with you in the first two weeks of term. The principal role of your Advisor is to arrange that you receive the help that you may need during your initial years in university. If you find, for example, that you are running into academic or personal problems, or that you are unsure of what is required of you, or if you have queries about the facilities available, you are strongly recommended to make contact with your Advisor at the earliest possible opportunity. They will make every effort to either help you directly or will ensure that you are put in contact with the staff members who can best provide the necessary advice.

Jargon Buster – Modules, Programmes, Levels

All courses in University of Galway are made up of 'modules'. These are usually described by a set of 'Learning Outcomes' that state what you should be able to do after successfully completing the module and a number of 'ECTS' credits. ECTS is basically an indicator of how big the module is. A module that is rated at 5 ECTS, for example, means that you need to spend at least 100 hours of concerted effort (including lectures, exams and self-study) in order to complete it satisfactorily. A module that is 10 ECTS, unsurprisingly, requires double that effort. A whole year's worth of modules (if you are a full-time student) should total up to 60 ECTS (30 in each semester). To be awarded the credits for a module you must of course have successfully completed it in terms of attendance, participation, coursework and examinations.

A 'programme' is a whole degree course, made up of all the individual modules. It is usually described by 'Programme Learning Outcomes' and there will be rules that determine which modules you need to successfully complete each year to end up with the appropriate degree title (e.g. BSc, BE (Mechanical), BComm, etc)).

All of our degree programmes are recognised by employers and other educational institutions and comply with international agreements on course structure (the 'Bologna Process'). All programmes are subject to regular quality reviews where the quality of the teaching and learning is scrutinised by an external panel with international experts in the subject. Every programme also has an 'external examiner' (a senior academic from

another university) who oversees the final decisions about grades, checks the examination papers and processes and guarantees that the quality of our courses and graduates compare well with the standards in the subject.

Ireland has a National Framework of Qualifications (NFQ) that describes the levels of all courses of study and this matches similar schemes in other countries so that it is easy for employers and educators to make sense of different qualifications obtained from different institutions, as well as making it easier for students to move between one country and another, picking up credit and qualifications along the way. According to this scheme, an undergraduate honours degree (BA, BSc, BE, etc) is a 'level 8' qualification. A Masters would be level 9 and a PhD level 10.

“All programmes are subject to regular quality reviews where the quality of the teaching and learning is scrutinised by an external panel with international experts in the subject.”

So what does this mean in practice?

Well, that you must attend all the scheduled classes, spend time every week on reading, studying and working through course materials and that what you are trying to do in the assessments and exams is show that you can actually achieve the learning outcomes. There's still plenty of time to socialize and get involved in clubs and sports (see later section) outside the 40 hours! The lectures, labs, tutorials and other classes, combined with the textbooks, online materials, and the library are all resources that the University provides to help you succeed. At the end of the day, though, success depends on your own efforts. It is possible to not only succeed in the assessments and feel a sense of achievement at having learned new knowledge and skills, but also to enjoy being a student in your chosen subject. Your final qualification will be well-regarded and recognised internationally by employers and other educational institutions across the world.

The University doesn't see you as a 'customer' or a 'consumer' but hopes that you will, instead, be a member of our academic community. That you will be able to get the most out of being in a city of ideas and learning not just about the basics of your subject but also get a feel for the latest research, the big ideas, the debates and where future opportunities lie for further study, research or employment.

Science Student Laboratory Numbers

Following the completion of your on-line registration, you will be emailed a laboratory number (normally in week 2 of term). This number is used when drawing up timetables for practical classes.

Vevox (live polling)

University of Galway uses Vevox, which is an interactive-polling software. Teaching staff may run polls during lectures in order to facilitate discussion and engagement. Vevox runs on a web browser, or as an app on smartphones and tablets. If your lecturer runs a poll in class, they will first prompt you to join the poll via your phone or laptop via the web address vevox.app using a nine digit code which they will display on screen.

“The University doesn't see you as a 'customer' or a 'consumer' but hopes that you will, instead, be a member of our academic community.”

Know The Code!

Your programme has a unique University Code. This is the code you will see on your registration statement and class and examination timetables. For example (GY301) Science is referred to as 1BS1

- (GY301) Science (1BS1)
- (GY303) Biomedical Science (1BO1)
- (GY304) Biotechnology (1BY1)
- (GY308) Environmental Science (1EV1)
- (GY309) Financial Mathematics & Economics (1FM1)
- (GY310) Marine Science (1MR1)
- (GY313) Environmental Health and Safety (1EHS1)
- (GY314) Earth and Ocean Sciences (1EH1)
- (GY318) Biopharmaceutical Chemistry (1BPC1)
- (GY319) Mathematical Science (1BMS1)
- (GY320) Physics (Applied, Astrophysics, Biomedical, Climate, Theoretical) (1PHO1)
- (GY321) Genetics and Genomics (1BGG1)
- (GY322) Agricultural Science (1AGS1)
- (GY350) Computer Science (1BCT1)
- (GY401) Engineering (Undenominated) (1EG1)
- (GY402) Civil Engineering (1BE1)
- (GY405) Mechanical Engineering (1BM1)
- (GY406) Electronic & Computer Engineering (1BP1)
- (GY408) Biomedical Engineering (1BG1)
- (GY410) Project & Construction Management (1BCM1)
- (GY413) Energy Systems Engineering (1BSE1)
- (GY414) Electrical & Electronic Engineering (1BLE1)

Programme Information

(GY301) Science (1BS1)

Type	Choice	Credits	Code	Module Title
Optional	(4*15)	15	MA180	Mathematics (Honours) *
		15	MA161	Mathematical Studies *
		15	MP180	Applied Mathematics *
		15	BO101	Biology
		15	CH101	Chemistry
		15	CS102	Computer Science
		15	PH101	Physics

Note:

* Students are required to register for at least one of the following:

MA161: Mathematical Studies
 MA180: Mathematics (Honours
 MP180: Applied Mathematics
 where MA161 and MA180 cannot be registered for at the same time - please refer to relevant orientation talk, for advice on selecting these modules.

On your Registration Portal, the 1st Year modules are divided into 3 Module Groups entitled:

- Mathematical Studies
- Mathematics Honours
- Applied Mathematics

Each group contains one of the above core modules for which you will automatically be registered. You can then select your remaining modules from the list of optional modules as outlined above.

Students should note that their selection of optional modules in First Year can have a consequence on their choice of pathways in 2nd year, since the following first year modules in the table below are required for students entering their Second-Year courses. Please refer to the information in relation to 2nd year Module Selection on pages 15-17.

2nd year Module Selection

Students should note that their selection of optional modules in First Year can have a consequence on their choice of pathways in 2nd year, since the following first year modules in the table below are required for students entering their 2nd year pathways.

2nd Year		First Year Modules						
Type	Pathway/Electives	ECTS	BO101: Biology	CH101: Chemistry	PH101: Physics	CS102: Computer Science	At Least One of:

Allocation of 2nd Year Pathway/ Elective Places

In 2nd Year, there is a capacity limit on the places available in each pathway/elective. Students are allocated their pathways/electives based on their overall 1st Year results and submitted pathways/electives preferences for 2nd Year.

Indicative places available in each 2nd Year Science Pathway (based on the 2021/22 academic year)

Type	Pathways	Places
Pathways	Chemistry	120
	Medicinal Chemistry	20
	Applied Mathematics	n/a
	Computer Science	58
	Mathematical Studies	n/a
	Mathematics	n/a
	Biochemistry	140
	Botany and Plant Science	87
	Earth & Ocean Sciences	70
	Microbiology	140
	Plant and AgriBiosciences	110
	Zoology	75
	Physics and Applied Physics	80
	Anatomy	15
	Pharmacology	20
Physiology	35	

The Procedure/Guidelines for allocating places is as follows:

- Students are ranked in order of merit based on their overall 1st year result across all modules. Therefore it is a student's overall performance that determines his/her place in the allocation of modules.
 - Students must complete a Module Selection Form in Semester II listing their preferred list of pathways and electives. This Form must be submitted by a given deadline.
 - Students who pass in the Summer Examinations are ranked in order of merit and allocated places within the capacity limits based on their choice combinations and prerequisites. Confirmation on the pathways and electives offered to each student will be emailed individually to students at their University of Galway email address (usually during the month of July).
 - Students who fail one or more examinations at the Summer Examinations are dealt with after the Autumn repeats and are allocated the remaining places within the capacity limits once their overall mark can be calculated at this stage. Confirmation on the pathways and electives offered to each student will be emailed individually to students at their University of Galway email address (usually at the beginning of September).
 - Students who submit their Module Selection Form after the submission deadline are dealt with after the "on-time" students, regardless of their rank in the order of merit.
- A 2nd year Advisory Session will be held in Semester II and further information will be provided at this time.

GY301 Science, Year-2 pathway and elective module allocations – a Guide.

In 2nd Year, there is a capacity limit on the places available in each pathway/elective. Students are allocated their pathways/electives based on their overall 1st-Year results and submitted pathways/electives preferences for 2nd Year.

The Procedure/Guidelines for allocating places is as follows:

1. A student is allocated pathways and electives with consideration to student preferences as submitted to the College Office, via the “2nd Year Science Module Selection Form”, by a specified date (usually mid-May).
2. Each student is allocated Year-2 modules to an exact total of 60 credits.
3. All students are allocated at minimum two Year-2 pathways.
4. Students must satisfy the Year-1 pre-requisite modules to enter a Year-2 pathway.
5. Each student will be allocated Year-2 pathways and modules that satisfy entry into at least one approved Year-3 stream, i.e., an approved Year-3 single-subject pathway or approved compatible dual-pathway.
6. Some pathways have quotas, i.e., a limited number of places. Where a student has specified a preference for a pathway for which there are no places remaining, then the student's next preference will be considered. Students progressing in June following the Summer Examinations are ranked by order of Overall Merit achieved in the First-Year Examinations. In the order of ranking, students with higher Overall Merit are reviewed first for the purposes of allocating pathways.
7. Some pathways are not approved compatible pathways at 2nd year. Where a student has specified a preference for a pathway which is not compatible with a pathway already allocated to the student, then the student's next preference will be considered.
8. Some pathways at Year 3 can only be taken as part of a dual-pathway stream. In allocating modules that satisfy entry into at least one Year-3 stream, where a student has been allocated a pathway which can only be taken in Year 3 as part of a dual-pathway, then the next compatible pathway in the student's preferences will also be allocated.

9. Students may be allocated up to three pathways at 2nd year. In the preferences survey, students are asked to select one of two options which provides indication that the student wishes to forego one of three 20-credit pathway allocations in favour of a selection of two pathways plus elective modules. Students provide ranked preferences for all electives, in addition to their ranked pathways via the preferences survey.
10. When pathway allocation has been completed for a student, and the total credits for allocated modules for those pathways is less than 60 credits, then modules from the elective list will be allocated to the student, with consideration to the student's preferences and timetable compatibility.
11. Information on pathways, electives, and Year-1 pre-requisite modules can be found in the GY301 Science Course Outline document. Students are provided with introductory talks on pathway options throughout First-Year Orientation. Students are provided with a Year-2 Advisory Programme, towards the end of Semester 2 of First Year, usually held in March, prior to submitting their preferences via the "2nd Year Science Module Selection Form" in mid-May.
12. Students progressing in June following the Summer Examinations, should expect allocations to be communicated to them, by email to their official university email address, no later than the end of July. Students progressing following the Autumn Examinations, should expect allocations to be communicated to them shortly after exam results are released for the Autumn sitting.

Indicative places available in each
2nd Year Science Pathway (based
on the 2022/23 academic year)

2nd Year Pathway	Places
Anatomy	15
Pharmacology	20
Physiology	35
Medicinal Chemistry	20
Chemistry	120
Biochemistry	130
Microbiology	120
Plant and AgriBiosciences	44
Botany and Plant Science	55
Earth & Ocean Sciences	46
Zoology	68
Physics and Applied Physics/Physics and Climate Physics	80
Computing/Mathematical Studies and Computing	58
Mathematics	No place limit applies
Applied Mathematics	No place limit applies
Data Science	No place limit applies

Contacts:

Please contact your Academic Advisor in the first instance.

Programme Director: Dr Emma Holian,
Email: emma.holian@universityofgalway.ie

Time Limits:

A time limit of two years applies to the successful completion of examinations in each year of a programme. These are detailed in the University of Galway Undergraduate Marks and Standards.

Students failing to complete examinations within the specified periods will be ineligible to proceed further towards their degree in this University. Extension of Time-Limit requests may be considered by the College only for very grave reasons.

Students may have the option to exit their degree programme with an ordinary BSc/BTech Degree (NFQ Level 7) once their Third-Year examinations have been passed as a whole.

Grading Scheme:

Overall marks are not available for Semester-1 assessments until after the First-Sitting/Summer Exam Board Meeting which usually takes place in June. Provisional grades for Semester-1 modules are however made available to students early in Semester 2 and follow the grade scheme below.

Percentage	Grade
70 - 100	A
60 - 69	B
50 - 59	C
40 - 49	D
35 - 39	E+
30 - 34	E-
0 - 29	F

These grades are provisional only and not official until results are released formally after the Summer Exam Board Meeting, at which time students will be issued with a transcript of results including marks for each module and an overall calculation for the year.

Academic Integrity

In response to the challenges this changing academic integrity landscape brings, the University of Galway have in 2022 approved a new Academic Integrity policy. This is available here: universityofgalway.ie/centre-excellence-learning-teaching/teachinglearning/academicintegrity/

Marks and Standards

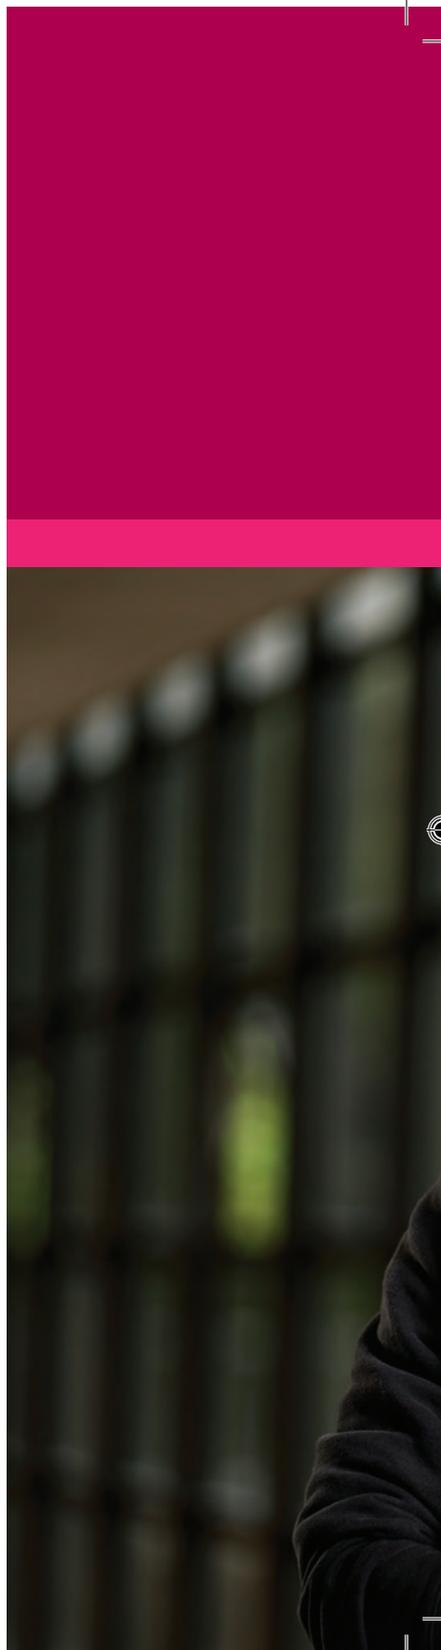

The University Marks and Standards are available at the following website: www.universityofgalway.ie/exams/policies-procedures/.

Science Programmes Regulations – Sub-module Components

(applying to GY301, GY303, 304, 308, 309, 310, 313, 314, 318, 319, 320, 321, 322)

In addition to having to obtain an overall module mark of at least 40% in a 15-credit First-Year module in Science programmes, a student must obtain at least 35% of the module's continuous assessment mark in order to pass the module. Where a module is assessed on the basis of 60% for written exams and 40% for continuous assessment, this equates to obtaining at least 14 of the 40% awarded for continuous assessment.

There is no opportunity to complete or retake continuous assessment in the period between the Summer examinations and the Autumn examinations. Accordingly, a student who fails to obtain a mark of at least 35% in the continuous assessment component of a 15-credit First-Year module at the Summer examinations cannot pass the module at the Autumn sitting and must re-register for the module as a First-Year repeat student the following year. A student repeating a module the following year must re-engage in all parts of the module.

Scholarships and Prizes

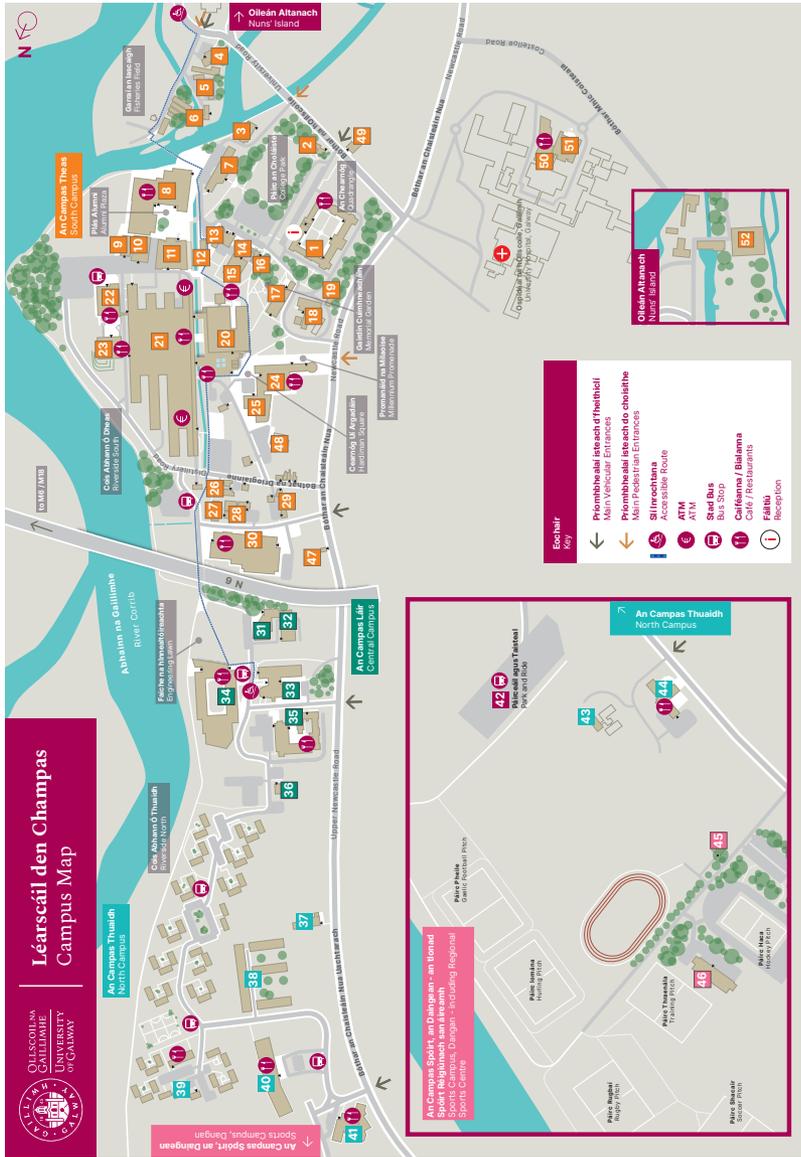

A wide range of scholarships and prizes are available to current and potential students in the College of Science and Engineering. universityofgalway.ie/science-engineering/scholarships/
